

ABOUT US

Thermaissance is a, "Quality of Care" centered personal protective equipment (PPE) manufacturing organization, committed to protecting and enhancing the safety of care providers and patients, by reducing microbial contamination of textiles and risk of infections.

Scientifically proven to inactivate over 99.999% Coronavirus, Staphylococcus aureus, Klebsiella pneumoniae, E-coli, MRSA, VRE, CRE, Mucor species etc.

Specific Product Features Include:

- Nanotechnology based fabric manufacturing
- Reusable PPEs, Patient Kits and Smart Patient Blankets
- Scientifically tested in various ISO 17025 certified laboratories (WHO's requirement)
- The technology works by using smart fabrics, and disrupting the membrane of viruses and bacteria, and killing them.

OUR OBJECTIVE

Thermaissance's objective is to reducing the microbial contamination of textiles and resulting risks of pathogen infections among healthcare workers, patients and general public.

OUR KEY VALUE PROPOSITION

- Reduce microbial contamination and resulting risks of pathogen infections in clothing (i.e. PPEs, scrubs etc) among care providers, healthcare workers and patients.
- Affordable, Reusable PPEs, Patient Kits and Smart Patient Blankets
